Astro Richmond 285 Exterior Wall Light

Astro Richmond 285 Exterior Wall Light is a wired-in exterior wall light with a Textured Black stainless steel frame, clear glass diffuser, and vertical wall-mount installation.

The Richmond 285 is the largest fitting in the Richmond wall light range, with a traditional lantern-style form suited to exterior settings. Its clear glass diffuser leaves the lamp visible, while the Textured Black finish gives the fitting a defined architectural outline against brick, render, or painted exterior walls.

With an IP44 rating, the Richmond 285 is suitable for exterior use and can be mounted on flammable materials. It is dimmable when used with a suitable dimmable lamp, and Astro notes that it is suitable for use within five miles of the coast or in other onerous environments, subject to a three-year warranty. Most suited to front doors, garden walls, patios, porches, and traditional exterior schemes.
