PRODUCT DESCRIPTION

Designer: Marcel Wanders

Space-Frame Floor Lamp by Moooi

A frame, with a geometric arrangement constitutes the main part of the Space Frame floor lamp. This geometric net of metal wires has numerous light sources on it, like crystal lamps. Reminding us something from how satellites move around in outer space, the entire surface of the lamp can rotate; thus changing the direction of the light. Space Frame floor lamp has beautiful oak legs to support its structure. The floor lamp is available in two colour options, each with a different oak finish. You can select from a copper frame and white washed oak legs or a nickel body and cinnamon legs.

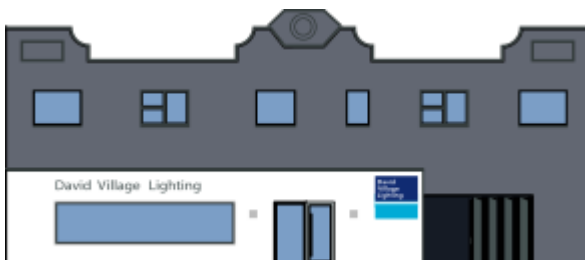

Space Frame lights utilise the trademarked technology developed by Moooi, **Electrosandwich®**. This technique powers the LED via the conductive material within the lamp's frame, without the need for any wires. And just like that, the design possibilities are endless, allowing Moooi to place lights anywhere they want without having to install cables and wires.

The [Space Frame Collection](#) also includes a suspension light, available in two sizes and in a nickel or copper finish; a light for every room and every interior space. The lights are suitable for both residential and commercial use, but could also be used in hospitality.

PRODUCT SPECIFICATION

Light Source: 20W, 2700K, 275 lumens
IP Code: 20
Dimming: Inline dimmer included on cable.
Dimensions: 155 cm height
 43 cm depth
 123 cm width
 400 cm cable length
