PRODUCT DESCRIPTION

Designer: Joel Hoff

HAY Turn On Table Lamp

The HAY Turn On Table Lamp was designed by Joel Hoff who designs products that inspire people to own fewer things and instead own items that remain in use for a longer period of time. This idea of durability and effortlessly simple design produces items that are reliable and long lasting.

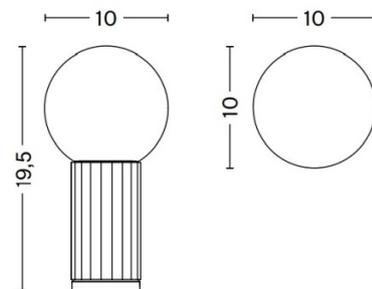

A feature that sets this light apart from the rest is that movement is built in. The base not only acts as the stem but also acts as the integrated switch and dimmer. Turning the base in a clockwise direction clicks the light on, and when the base is turned more, the brightness increases. This feature makes this light highly functional and user-friendly as you can dim or brighten the light with ease. This simple table or desk lamp has been described as being pleasing to touch as the faceted aluminium cylinder and opal glass spherical diffuser contrast each other beautifully. Perfect for a desk, workspace, bedside table and many more, this HAY Turn On Table Lamp comes in Black, Aluminium or Blue. The Turn On offers a touch of functionality and elegance to any interior.
