## PRODUCT DESCRIPTION

**Designer:** Joe Colombo

### Oluce Fresnel 1148 LED Wall Light

The Oluce Fresnel 1148 LED Wall Light is a modern interpretation of Joe Colombo's 1966 original. Equipped with an energy-efficient LED light source, this wall light preserves the iconic Fresnel lens design, ensuring even and soft light dispersion. Compact in size, with a 10cm diameter, the lamp is designed to fit seamlessly into a wide range of spaces while delivering powerful illumination. Its IP44 rating enhances its versatility, making it ideal for both indoor and outdoor use, even in damp environments.

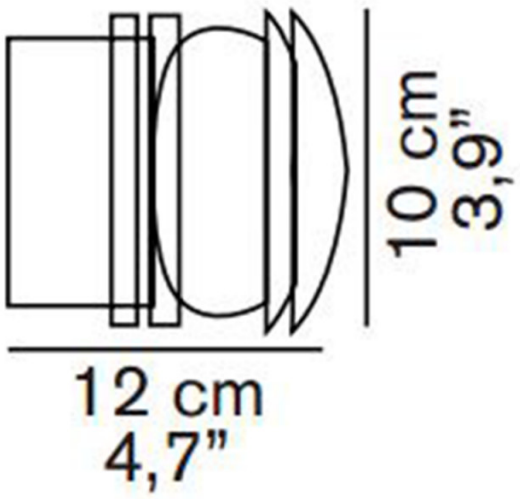

By integrating advanced LED technology, the Fresnel 1148 LED Wall Light offers improved efficiency and longevity without compromising the original's elegant aesthetic. Available in white, black, or grey finishes, this wall light is perfect for residential or commercial spaces that value both design and functionality.

Oluce Fresnel 1148 is also available in a non-LED version: **Oluce Fresnel 1148 Wall Light**. Colombo thoughtfully designed both the lights to work in both residential settings as well as commercial.

**The Oluce Fresnel 1148 LED Wall Light is also available in a white or grey finish, please contact us for more information and pricing.**
