PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

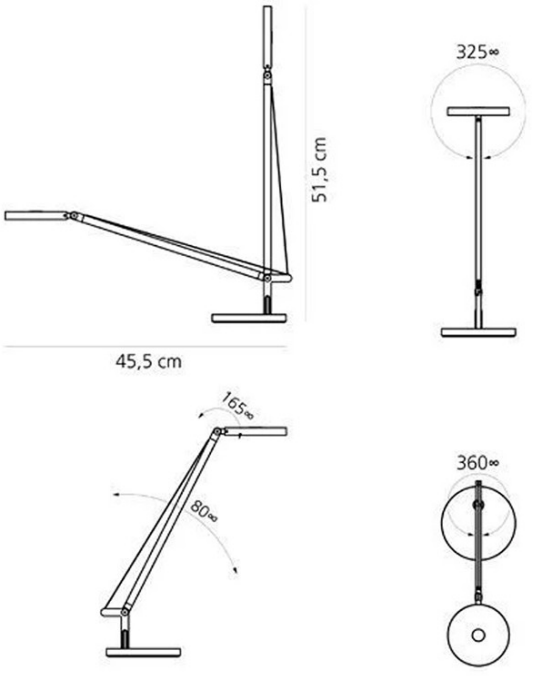

Artemide Demetra Micro LED Table Lamp

The smallest of the Demetra desk lamps, the Artemide Demetra Micro offers great flexibility, with an adjustable diffuser that you can tilt and rotate. The arm can be tilted as well (up to 60°), allowing you to fully control and direct the light, depending on use and need. The Artemide Demetra Micro Table Lamp also benefits from an integrated dimmer switch atop the diffuser, so you can adjust light intensity and generate a personalised ambience. Demetra Micro combines all that freedom in a compact size, making it a premium task lighting solution for your desk or other workspace. The table lamp is suitable for any interior space, whether residential, commercial or in hospitality.

Form and function merge into one in the Demetra Micro Table Lamp, as it gracefully combines tension wiring and LED high-efficiency light with other interactive features. This table lamp can be used independently or alongside other designs in the **Demetra Collection**, which includes various wall lights, spotlights, and floor lamps, and is further complemented by the **Demetra Professional** task lights.
