PRODUCT DESCRIPTION

Designer: Herzog & De Meuron

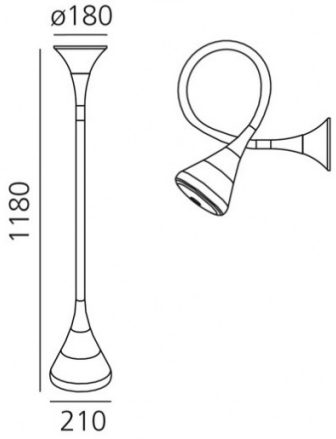

Artemide Pipe LED Ceiling / Wall Light

The Pipe Ceiling/ Wall Light was designed with flexibility in mind. The adjustable stem, made from painted steel and covered with a natural anti-yellowing case, allows for both movement and functionality. The wall attachment and diffuser are crafted from transparent rubber-effect painted polycarbonate for a “soft touch” covering. The flexible nature of the Pipe Ceiling/ Wall Light is both functional and playful, adding a touch of whimsy to any interior.

The Pipe has been reimagined with an LED light source for eco-friendly and energy-efficient lighting. When illuminated, light is cast into a wide beam, while perforations in the diffuser allow some light to escape for a pleasantly sheer ambient lighting. The bright beam of light can be directed precisely where required for functional task lighting, perfect for use at a bedside, in an office, or in a living space. In commercial environments, the Pipe Ceiling/ Wall light suits office spaces, restaurants, and hotels, adding a strong personality to the space along with bright, welcoming lighting.

PRODUCT SPECIFICATION

Light Source:	27W, 2700K, 1763 Lumens
IP Code:	20
Dimming:	Push to make/switch dimming, dimmable using push-to-make switches. Please consult your electrician; additional wiring may be required on-site.
