PRODUCT DESCRIPTION

Designer: Omer Arbel

Bocci 84 Series Surface Light

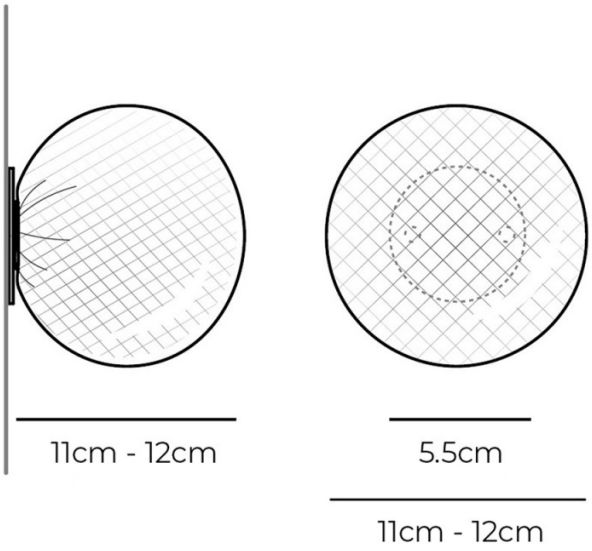

The 84s Surface Lamp is a light that is suitable for both wall and ceiling applications, being a handy and useful light that provides a warm and inviting illumination. The 84s Ceiling/Wall Lamp is made from blown glass using a special technique where glass is pushed through a copper mesh. A white globe is put inside the mesh and plunged into clear hot glass, pushing the white glass through the copper to create a pillowed effect.

The combination of white and copper creates beautiful pink, yellow and orange colour hues that are mesmerising and wondrous. The surface light can be used in a wide variety of settings, with the small size making it perfect to use in multiple around a room or in a corridor. A stunning, striking and functional light.

Please Note: the Bocci 24s Surface Light comes with a driver that must be housed remotely.
