Brokis Capsula LED Pendant

The Brokis Capsula LED Pendant brings natural form and optical depth together in a bold lighting feature. Designed by Lucie Koldová, the pendant mimics the anatomy of a seed or cell, with a central tubular LED light suspended along a visible axis within two layered glass shells. The result is a floating nucleus of light surrounded by softly tinted glass, creating dramatic three-dimensional effects.

Made from separate handblown glass components and held together with custom Brokis connectors, Capsula offers refined engineering without visual clutter. The light hangs from a steel ceiling canopy via dual suspension straps that neatly incorporate the power cable. Available in multiple colour options, the pendant can be displayed solo or in architectural groupings to create bespoke installations in both residential and commercial interiors.

Dimmable options are also available, please [contact us](#) for more information and pricing.

PRODUCT SPECIFICATION

Light Source: 5W, 2700K, 300 Lumens**IP Code:** 20**Dimming:** Non-dimmable.**Dimensions:** Height: 26.5cm
