PRODUCT DESCRIPTION

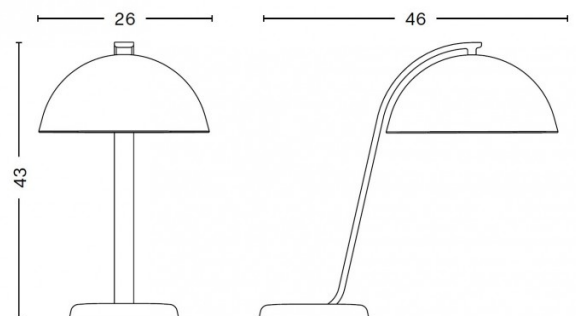

Designer: Lars Beller Fjetland

HAY Cloche Table Lamp

The HAY Cloche Table Lamp was designed by Norwegian designer Lars Beller Fjetland with the aim of creating a decorative and functional directional lighting solution. This sculptural desk lamp features a domed shade, angled powder-coated aluminium arm and an off-centre cast iron base. This design creates a sense of visual imbalance resulting in a striking silhouette that celebrates the qualities of the materials used.

Inspired by the traditional dining cloche, Lars Beller Fjetland uses his designs to perform a deep level of investigation into the materials he uses. This results in many prototypes and research into each and every product. Due to his fascination with nature and desire to use materials in combination, Lars Beller Fjetland has become critically acclaimed. This recognition has come from designs such as the Cloche that creates a distinct shape perfect for any space. Available in a carefully selected colour palette, this table lamp produces a directional light which is ideal for a variety of office and home settings.
