PRODUCT DESCRIPTION

Designer: Ryosuke Fukusada

Alysoid by Axolight

The Alysoid Collection was design by Ryosuke Fukusada for Italian manufacturer, Axolight. It is a collection of a hand crafted suspension lights, distinguished for the chains, draping from the light. The name derives from geometry and architecture, where alysoid, or 'catenary arch', refers to the curve created when a flexible chain is suspended from its two ends. In fact, this unique curvature has been used in the past by various designers and architects, like Antoni Gaudi (Catalan architect) and Kuroemon Kodama (designer of the Kintai bridge, 1673). Similarly, the Alysoid suspensions are created by hanging the a chain from two parts of the light, creating this geometric shape.The more chains are installed onto the suspension, the more amplified the effect. The chains themselves are a beautiful component of their own, with small spheres just like those used in fashion industry, for purses or jewellery.

The Alysoid becomes a suspension with volume, but with no visual block to anyone in the room. With a simple grey aluminium structure and integrated LED source, the result is unique and awe-inspiring. The lights are available in four different sizes and three different diameters. You may also choose a chain finish between a black nickel or natural brass. The suspension can be used on its own, or if you wish you may install multiple Alysoid lights and create a unique cluster of lights.

PRODUCT SPECIFICATION

Light Source:	20W, 3000K, 1800 lumens
IP Code:	20
Dimming:	Dimmable via mains phase dimming.
Dimensions:	**Alysoid 34** - Ø 34.5 cm, 54 cm H, max 250 cm drop **Alysoid 43** - Ø 43 cm, 80 cm H, max 300 cm drop **Alysoid 51 P** - Ø 51.5 cm, 100 cm H, max 330 cm drop **Alysoid 51 G** - Ø 51.5 cm, 170 cm H, max 400 cm drop
