PRODUCT DESCRIPTION

Designer: Rainer Mutsch

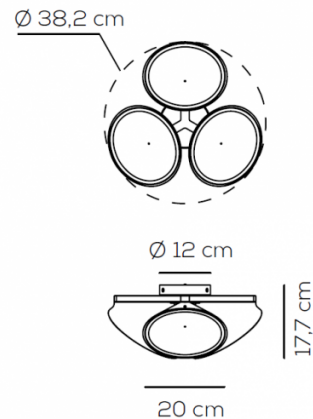

Orchid PL by Axolight

A design by Rainer Mutsch, who is constantly in search for inspiration by merging materials with innovative manufacturing and design process. For Orchid PL light, Rainer drew inspiration from the natural blossoms found in nature and created these shades that open up like flowers from a central pole, or point. Each shade is pointing in a different direction, emitting a warm diffused light. Orchid PL light is available in three colour options, sand, white or anthracite grey; allowing you to match the lights with any interior decor. Install the Orchid lights in your living room, the bedroom, in a waiting or reception area; a light that is perfect for residential spaces as much as commercial areas.

Browse through the [Orchid Collection](#), and select your favourite. The collection includes a floor lamp, a vertical and a horizontal light and a single wall/ceiling light.
