barcelona lights

In 1996, Gonzalo Milà and Juan Carlos Ines designed a lamp made of aluminium. But at that time his idea was a prototype. The moment to launch Penta finally arrived, and a very important change to make it happen was to replace the initial folded plate with the stamping technique. Choose a corner and let Penta create its warm atmosphere, either illuminating a space or as mood lighting thanks to the incorporated dimmer.

Also available as - Antique copper exterior, polished brass inside. Please contact us for more details and pricing.
