PRODUCT DESCRIPTION

Designer: Lee Broom

Lee Broom Acid Marble Table Lamp

The Lee Broom Acid Marble Table Lamp utilises high-quality materials to craft a contemporary lighting solution for your coffee table. The lamp consists of a layer of tinted glass combined with a layer of Carrara marble that is placed behind it, the result is an illuminated circular diffuser that makes the marble appear yellow, resembling a sunrise and applying a playful touch to the design. The Acid Marble Table Lamp is set into a solid black marble base and emits a warm glow, providing a calming ambience and enhancing the veins throughout the marble.

Each Acid Marble Table Lamp is completely unique, due to the nature of the marble and also the fact that the lamp is made to order. It boasts a structural form, which can adapt to a range of interior styles, making it perfect for residential and commercial spaces alike. Lee Broom Acid Marble Table Lamp can illuminate your home or commercial spaces such as restaurants, bars, shop counters, galleries and even libraries.

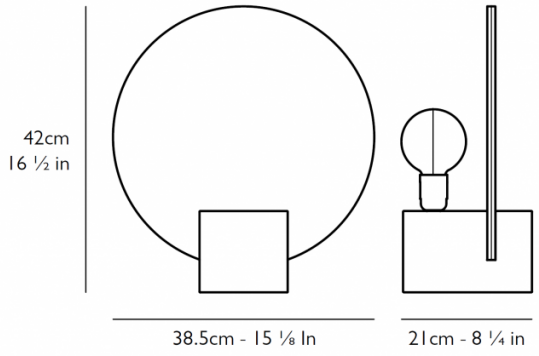

PRODUCT SPECIFICATION
