PRODUCT DESCRIPTION

Designer: Lee Broom

Lee Broom Carousel LED Suspension

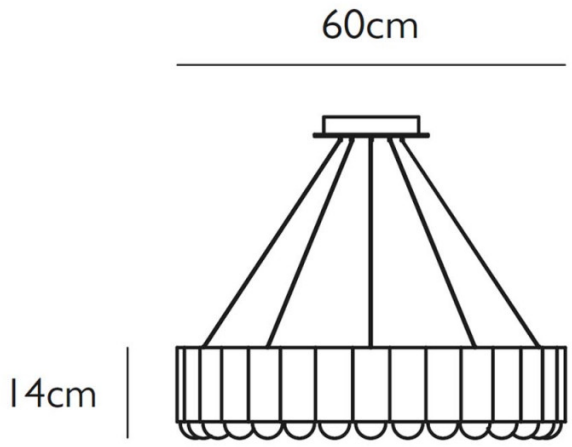

Designed by Lee Broom and inspired by a traditional British fairground ride, Carousel is suspended in the air appearing to float above you. Carousel consists of 30 metal cylinders, which encompass an LED light source creating a ring of light which projects a functional but glare-free illumination onto the area below. It is suspended from a polished gunmetal ceiling plate by steel tensile wires with a single clear cable.

This suspension becomes a focal point in whichever room you display it in and is a beautiful addition to contemporary dining spaces, both residential and commercial. Lee Broom Carousel can also make a statement in modern kitchens, entryways, over shop counters and above hotel reception desks.

The Lee Broom carousel is available in Black, Chrome, Gold or Gunmetal.
An XL version with a 120cm diameter is also available, please contact us for more details and prices.
