Astro Blanco Twin Recessed Downlight

The Astro Blanco Twin Recessed Downlight is a plaster-in ceiling light designed for installation into ceilings that have already been plastered, creating a clean and understated architectural look. Once fitted, the surrounding gap can be filled, smoothed and painted over so the fitting blends neatly into the surface and complements a wide range of interior schemes.

With two individually adjustable light sources, Blanco Twin offers a more flexible lighting solution than a standard single downlight. Each spotlight can be tilted by 30° and rotated by 360°, allowing you to direct the light where it is needed most. This makes it especially useful in bathrooms, kitchens, hallways and other spaces where a combination of focused and functional lighting is required.

Blanco Twin uses two GU10 lamps, sold separately, and is dimmable when paired with compatible dimmable bulbs. Rated IP20, it is suitable for indoor use and can be installed in the bathroom zone 3. Its plaster finish can be painted to match the ceiling, making it a refined choice for contemporary residential and commercial interiors.
