PRODUCT DESCRIPTION

Designer: Neil Poulton

Artemide Talak Professional LED Table Lamp

One of Artemide's best-selling products, the Talak Professional Table Lamp has been re-envisioned in accordance with the growth of LED technology. The Artemide Talak LED Table Lamp has the same silhouette and features the popular slender stem that allows you to adjust the height and direction of the lamp head. The integrated LED light source is emitted out of the lamp head onto the surface below, providing functional task lighting whilst taking up little space on your desk top.

Although more compact than the original design, the table lamp emits a light almost triple that of the original version, is energy efficient and eco-friendly. The striking white finish is contrasted with the aluminium stem, allowing the design to adapt to a range of modern spaces. The Artemide Talak Professional LED Table Lamp is a perfect addition to offices, workspaces and reading nooks.
