PRODUCT DESCRIPTION

Designer: Jacques Biny

Biny LED Table Lamp by DCW éditions

Originally designed by Jacques Biny, the Biny table lamp is now reissued with modern LED technology for a long-lasting glow. Jacques Biny was prominent in the 20th century, being an innovator of design, putting functionality and ease of use at the centre of his creations. This table lamp was designed in 1958 and is still as contemporary and modern now as it was then.

With a perforated lampshade and an angular base, the Biny table light has a graphic nature. The lampshade has shutters so the light stream is effective yet soft and the shade is also equipped with a wheel so you can adjust the shutters how you need. You can choose between black or white shutters and a white or black base to find the right finish for your design scheme. Perfect for desks, tables and side tables this table light is wonderful as both an ambient or a reading/task solution.
