Copenhagen SC14 Floor Lamp by &Tradition

Designed by design duo Space Copenhagen, the Copenhagen SC14 floor lamp is a 2018 addition to the [&Tradition Copenhagen collection](#). Developed from the duo's fascination with using contrasting elements in design, the Copenhagen floor lamp has a beautiful opal glass lampshade paired with a bronzed brass base, proving to be a combination of delicate and industrial materials in one design. The effect is a chic and elegant floor lamp, providing a warm diffused light perfect for lounge and reception rooms.

The Copenhagen floor light comes with a built in LED module which is dimmable, perfect for providing the light that you want for your space. The switch has a 4 step dimming system and a dim-to-warm function so you can choose the colour temperature you want from 2200K-2800K, with 2200K being a really warm white and 2800K being slighter cooler but still warm. With these possibilities available, this floor lamp is a wonderful installation in the home, being versatile enough for you to create the right atmosphere through lighting.

Designer: Space Copenhagen

IP Code: 20
