PRODUCT DESCRIPTION

Designer: Lee Broom

Eclipse Table Lamp by Lee Broom

The Lee Broom Eclipse LED Table Lamp is made of two circular plates, one of polished steel, and the other of opal acrylic. The sculptural silhouette is supported by a mirror-polished base that rotates 90 degrees in order to angle the light diffusion and reveal multiple profiles. A stunning piece for any contemporary interior, the Lee Broom Eclipse was inspired by the cosmos and, due to its ability to rotate, resembles two planets orbiting each other.

Almost Art Deco in style, this table lamp comes in either polished gold or polished chrome, utilise Eclipse LED Table Lamp as an eye-catching addition to a side table, bedside table or coffee table for an ethereal glow. The dimmer included on the cable also allows you to personalise the lighting output to create your desired ambience.
