PRODUCT DESCRIPTION

Designer: Lee Broom

Lee Broom Orion Tube LED Suspension Light

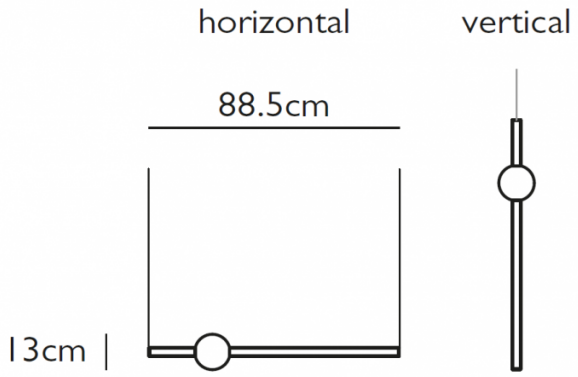

The Lee Broom Orion LED Tube Suspension is a minimalistic and contemporary lighting solution, consisting of an opal acrylic tube diffuser and a solid steel sphere. The companion of the **Lee Broom Orion Globe Light**, the pair are a beautiful interpretation of yin and yang in design. The Orion Tube offers an endless array of installation options, with the ability to suspend it both horizontally and vertically as well as the option to hang it individually or as part of a clustered installation.

This suspension is available with either a gold or a gunmetal sphere, both hosting the same opal acrylic tube diffuser. The tube diffuses the internal LED light source, resulting in a warm ambient illumination which creates an inviting ambience in your home or commercial space. Perfect for above dining areas, kitchen islands, restaurants, bars, galleries and even large modern workspaces

Please Note: The Orion Tube Suspension is supplied with a separate LED driver with 220-240v input.
