PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Giulietta LED Wall Lamp

The Catellani & Smith Giulietta wall light is a stunning fixture designed by Enzo Catellani with the aim of honouring his daughter. The design cleverly uses a flexible 30cm pipe that allows the user to adjust the direction of the lamp with ease. This flexing action gives the Giulietta wall lamp the ability to solve many different lighting solutions. From an ambient light directed at a wall or corner to a more focused task light for reading or studying. This maneuverability of the stem adds a modern and personalised touch to the design which brings a simple wall light into the ever-changing 21st century.

Another feature of this Catellani & Smith wall light that adds adaptability is the touchless dimmer integrated into the LED shade. This sensor in the shade allows the lamp to be easily dimmed and switched off and on. By simply hovering your hand around the sensor, you are able to use the four-step dimmer making the lamp highly accessible and easy to use. The nickel hoop shade at the end of the stem is beautifully hand crafted with an integrated LED module inside that produces an elegant light ideal for a bedside, vanity, or workspace.
