PRODUCT DESCRIPTION

Designer: Enzo Catellani

Catellani & Smith Giulietta LED Table Lamp

The Catellani & Smith Giulietta table lamp was designed by Enzo Catellani as a homage to his daughter Giulia. The sleek, simple design aimed to imitate the grace and elegance of Giulia with its shimmering finish and its discreet silhouette. The flexible stem of the Giulietta allows the user to move and adjust the direction of the light with ease. This results in many different lighting solutions as the Giulietta can be directed towards a wall or corner to create ambient light or it can be directed to a focus point for more purposeful task lighting for reading or studying. Another functional feature of the Giulietta is the touch-less dimmer integrated into the circular shade. This feature makes the lamp highly accessible and easy to adapt and control. By simply hovering your hand over the sensor, you can increase the lumen output and even switch off the light completely.

The functionality of this lamp means the Giulietta would be ideal for both desk and workspaces as well as bedsides and coffee tables. With the dimmable function and high adaptability, the Catellani & Smith Giulietta table lamp can be placed in any part of your home or commercial space.
