PRODUCT DESCRIPTION

Designer: Stefan Diez

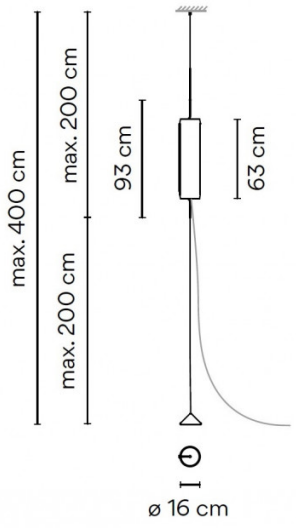

Vibia Guise 2272 LED Suspension Light

The Guise 2272 light is a floor-to-ceiling lamp that features a gorgeous glass lampshade and a triangular counterweight that sits beautifully just off the ground. The designer, Stefan Diez, presents a design which is innovative and original as the integrated LED source seemingly disappears in the depths of the glass shade, creating a warm diffusion which is mesmerising and ambient.

The Guise 2272 suspension light comes equipped with a handy optical sensor dimmer so you can control the intensity to get the exact atmosphere you want for your space. **The inclusion of a cable and plug** also means that you can place the Guise 2272 easily and swiftly in a nearby socket without the need for an electrical ceiling point, creating the look of a pendant light with little fuss. Use in a wide variety of settings for a unique and modern aesthetic and useful illumination.
