COPENHAGEN

Normann Copenhagen Amp Large Pendant Light.

Inspired by old tube amplifiers from the 1960s, Normann Copenhagen Amp collection is a unique and stylish design which gives a nod to midcentury industrialism. The unique shapes and classic materials of marble and glass add a nostalgic feel and yet a contemporary feel to Amp's design. Beautiful blown glass shades with an elongated form create an engaging design which can be installed singularly or as part of a cluster with a mix of sizes and colours.

Normann Copenhagen Amp large pendant is ideal for communal areas such as hallways or installed in a linear formation over kitchen islands and dining tables. Amp's versatile style can work perfectly within contemporary and retro interior designs.
