PRODUCT DESCRIPTION

Designer: Jordi Canudas

Marset Dipping Light LED Table Lamp

Marset Dipping Light LED Table Lamp is a plug-in table lamp by Jordi Canudas, made with a metal body and a glossy blown glass globe finished with layered paint. The paint forms rings across the glass, filtering the light and giving the lamp its shaded colour effect. It is a simple object when switched off, but the glass becomes more active when the lamp is turned on.

The table lamp works well on a bedside table, side table, shelf, sideboard, or low cabinet. The smaller version suits compact surfaces, while Dipping Light S and Dipping Light M give more height and presence where the lamp needs to hold its own in a living room, dining space, or hospitality interior. The layered glass makes it useful where the lamp needs to bring colour as well as warm light.

The table lamp comes in three sizes: Dipping Light, Dipping Light S, and Dipping Light M. White, Green, Amber, Burgundy, Chocolate, and Cream finishes are available, with Brushed Brass as the main structure finish and Graphite on selected versions. It works well on bedside tables, sideboards, shelves, and side tables, as well as in restaurants and hotels where a small glass lamp can add warm colour to a surface.

PRODUCT SPECIFICATION

Light Source:
Dipping Light: 2.2W, 2700K, 123 Lumens
Dipping Light S: 8.6W, 2700K, 765 Lumens
Dipping Light M: 8.6W, 2700K, 312 Lumens

IP Code: 20
