PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

Artemide Demetra LED Professional Table Lamp

With the rise in demand for task lights, Naoto Fukasawa expanded the Demetra Collection with the addition of the Demetra Professional lights. The Artemide Demetra Professional Table Lamp maintains the same streamlined and sleek design but has adapted the diffuser with a stronger LED source. The diffuser has been redesigned to function as a 'heatsink', preventing any heat from reaching the top of the diffuser. The thermodynamics behind this design permits an easier use, to adjust the head and use the dimmer switch.

The Demetra Professional table lamp has all the features of the Demetra collection, just with a stronger LED COB. With a dimmer switch on the diffuser, light intensity is easily adjusted. The head can pivot and rotate, and the arm is adjustable up to 45°. All these features will allow the user to control both the light and the direction, perfectly adjusting it depending on the task and use.

A light perfect for any interior, complementing all spaces, the Demetra Professional lights are perfect for your home, office and business. Explore the **Demetra Collection** and pick your favourite. The collection includes various applications, floor and table lamps, wall lights and spotlights. The design of the Demetra was awarded numerous awards, such as the Design Plus, light + building Frankfurt am Main, iF Design Award Deutschland and the Red Dot Design Award Essen in 2004.

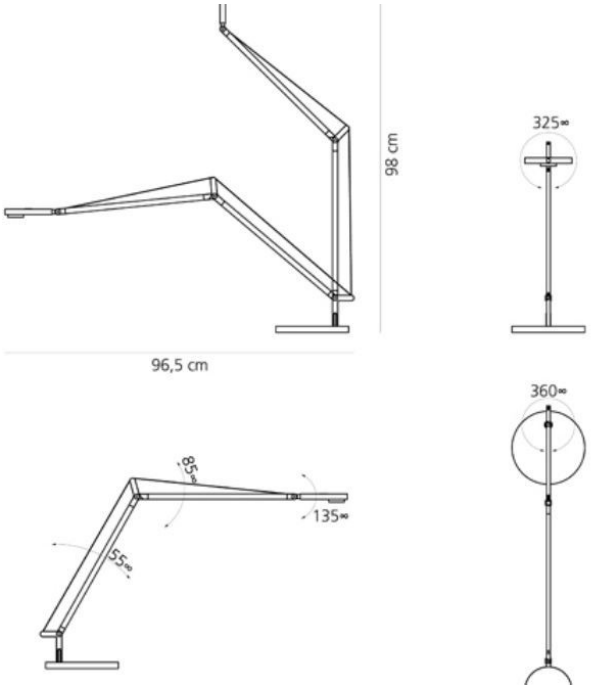

PRODUCT SPECIFICATION

Light Source: 12W, 3000K, 960 Lumens

IP Code: 20

Dimming: Integrated dimmer on the product.

Dimensions: Head: Ø20cm
Length: 31-100cm
Height: 35-102cm
