PRODUCT DESCRIPTION

Designer: Naoto Fukasawa

Artemide Demetra Professional Wall Light

With a design identical to the classic Demetra lights, the Demetra Professional Wall Light was the latest addition to Naoto Fukasawa's collection. The Demetra Professional was brought in to meet the growing need for a task light, one that will achieve higher illuminance on the working surface. The best performance is achieved even with the minimalist and compact design of the Demetra.

The Demetra Professional wall light is exactly the same in terms of design, but the diffuser is a far more complex optical device. The diffuser houses a powerful integrated LED source, compared to the **Demetra Wall Light** (with an 8W, 3000K and 385 lumens). The diffuser was further redesigned to act as a 'heatsink' by folding inside the head and housing the LED source, without letting the heat escape to the top. The thermodynamics behind the Demetra Professional design permits the user to handle the light without any contact with high temperatures safely.

The **Demetra Professional** subfamily, within the Demetra lights, also includes a table lamp and a floor lamp. Pick your favourite **Demetra** light and enhance any interior, in your home, office or business. The Demetra lights offer a wide range of movement and flexibility, with a head that can rotate and pivot and an adjustable arm.

Please note: this product comes with a cable and plug which needs to be plugged into a nearby power socket. This product cannot be hard-wired.

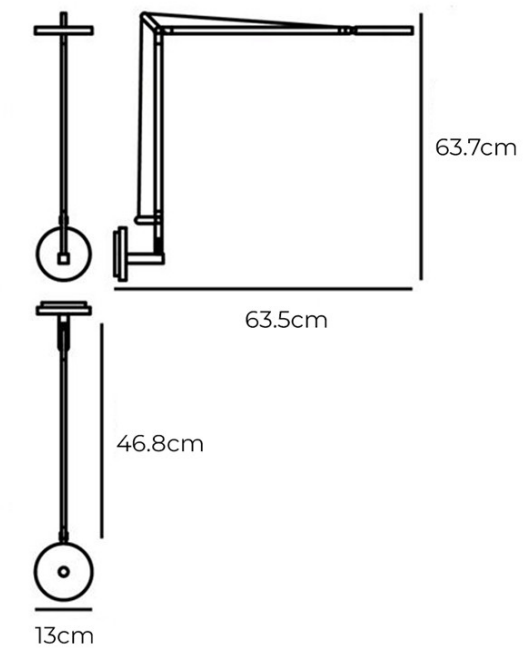

PRODUCT SPECIFICATION

Light Source: 12W, 3000K, 960 Lumens

IP Code: 20

Dimming: Integrated dimmer on the product.

Dimensions: Head: Ø13cm
Depth: 63.5cm
Height: 63.7cm
Depth: 46.8cm
