PRODUCT DESCRIPTION

Designer: Arik Levy

Vibia Structural 2612 LED Wall Light

The Vibia Structural 2612 LED Wall Light is a simplistic contemporary lighting solution, displayed horizontally across your wall. Designed by Arik Levy, this wall lamp combines direct and indirect LED light through cubic volumes that form sculptures integrated into the architecture of each space - utilising two LED light sources. His inspiration came from ancient architecture and the way we illuminate caves with torches placed in corners. Levy wanted to create a multi-functional wall light that could adapt to almost any contemporary interior.

The Structural 2612 LED Wall Light is boldly minimalistic, creating a striking silhouette whilst still unobtrusive in your space. Choose between two grey finishes to best suit your space, Structural is a great addition to your hallway, living room, dining room, kitchen or office. But there are not many spaces it cannot adapt to.
