PRODUCT DESCRIPTION

Designer: Arik Levy

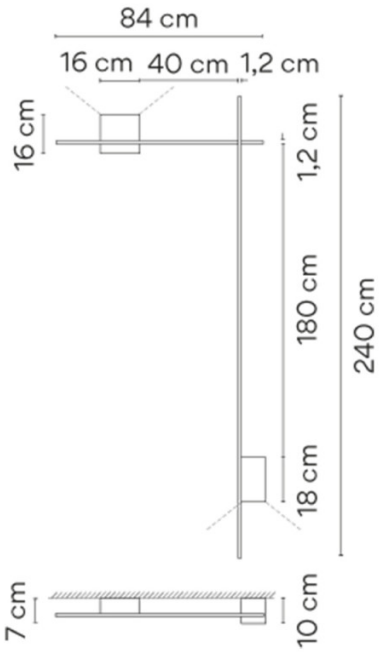

Vibia Structural 2617 LED Wall Light

An architectural design by Arik Levy, the Vibia Structural 2617 LED Wall Light combines sharp geometric shapes and cubic forms. The result is a bold but strikingly minimalistic LED lighting solution. Structural 2617 features two diffusers, one projecting an indirect up light towards the ceiling and one projecting a similar illumination down towards the floor, a contemporary wall light that plays with light and shadow. Thanks to the unique silhouette of the Vibia Structural, it not only creates a functional but inviting lighting effect but it is also just as striking when turned off. This wall light resembles a piece of art in your space.

The Vibia Structural 2617 LED Wall Light is available in two sleek grey finishes, it can easily adapt to almost any contemporary interior and makes a beautiful centrepiece on your wall in corridors, hallways, kitchens, dining spaces and staircases. It can also be utilised in commercial spaces, especially in the hospitality sector, it can create a unique atmosphere in restaurants and bars.
