PRODUCT DESCRIPTION

Designer: Arik Levy

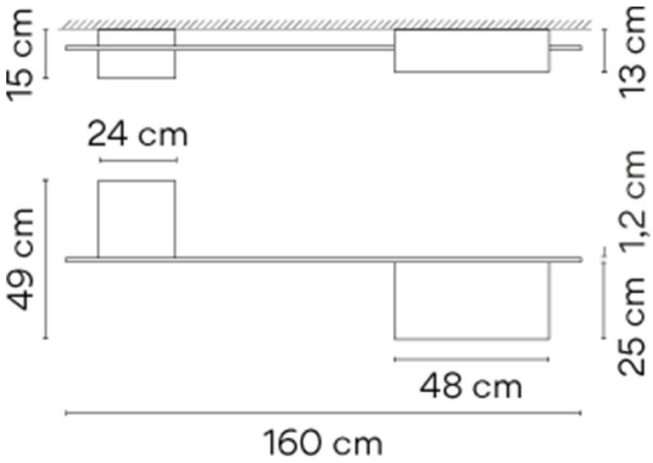

Vibia Structural 2642 LED Ceiling Light

The Structural 2642 LED Ceiling Light was designed by Arik Levy for Vibia, its inspiration came from the ancient routine of illuminating caves with torches placed in corners. This ceiling light is strikingly minimalistic despite its bold geometric shapes and utilises high-quality metal. This design plays with light and shadow, providing you with both direct and indirect illumination in order to grant you with highly functional but glare-free light.

With the Structural 2642 Ceiling Light, Levy deconstructs the light and integrates it into your surrounding - it is easy to forget that Structural isn't a work of art in your room but actually a functioning ceiling light. This piece is a beautiful addition to hallways, offices, reception areas or kitchens. Thanks to the two industrial style finishes, the Vibia Structural LED Ceiling Light can adapt to a vast array of contemporary interiors.
