Luceplan Compendium Circle LED Suspension Light

PRODUCT DESCRIPTION

Designer: Daniel Rybakken

Luceplan Compendium Circle LED Suspension

The Luceplan Compendium Circular Suspension provides functional, modern lighting for even large rooms. Designed by Daniel Rybakken, this luminaire can be mounted in different ways. Either as a downlight to shine down upon areas such as dining tables and living room coffee table, or mounted with upward beam distribution, so that the light radiates upwards towards the ceiling and reflects back to illuminate the room. This makes the light incredibly personable and depends on how you decide to display it - it can be adjusted by rotating the reflector at the time of installation.

The profile conserves a slim body, it is unobtrusive. The Compendium Circular Suspension is a striking light that attracts instantly with its unique design. The design is durable and strong, making it the best addition for contemporary homes or public spaces. This light harnesses high performance LED, keeping the form clean and minimalistic whilst still remaining a striking addition to your space.

Compendium Circular Suspension can be installed individually or combined in up to three rings to create your own unique composition.

Available in 3 sizes and 3 different finishes.
