PRODUCT DESCRIPTION

Designer: David Dolcini

Luceplan Garbi Wall Light

Designed by David Dolcini, the Garbi Wall Light boasts a futuristic yet simple appearance, almost blending into the wall itself. Dolcini says he created the wall light to have a sculptural quality and the result is impressive. With built in powerful LEDs this light is not only aesthetically pleasing but also incredibly functional.

The LEDs produce a warm white, glare-free light inside the diffuser which then casts a softly curved halo downwards against the wall through the opening below. A lot of the light is also reflected upwards against the wall to indirectly illuminate the room. It creates a very impressive graphic effect against the wall and ensuring a very unique and expressive lighting pattern. The LED light source can also be dimmed with a trailing edge phase control dimmer. Whether presented in your hallway, living room or your kitchen the Garbi adds a unique decoration and functional lighting to any space.

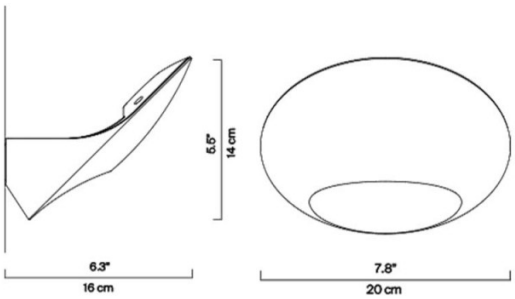

PRODUCT SPECIFICATION
