PRODUCT DESCRIPTION

Designer: Daniel Rybakken

Luceplan Compendium Plate LED Wall/Ceiling Light

The Compendium Plate Light is a simple but powerful design from the Italian traditional manufacturer Luceplan, designed by Daniel Rybakken. It is a modern and streamlined design with a circular frame made from aluminium and fitted with energy-efficient LEDs. These shine powerfully and with a warm white glow and provide exceptional general lighting, even in larger rooms, despite their slender form.

The external profile conserves a slim body, creating a surface almost flush with the wall and ensuring it is unobtrusive. The Compendium Plate Lamp is a striking light that attracts instantly with its unique design. The design is durable and strong, making it the best addition for contemporary homes or public spaces.
