PRODUCT DESCRIPTION

Designer: Manuel Vivian

Fairy 12 R Suspension by Axolight

A suspended light, with a linear arrangement, the Fairy 12 R is comprised of 12 individual Fairy lights hanging from a rectangular ceiling canopy. The Fairy lights were designed by Manuel Vivien for Axolight. Vivien had experimented extensively with blown glass, before becoming an interior designer. The Fairy lights are iconic for their multifaceted, glass diffusers. The light sparkles and reflects light, even when not turned on; similar to the effect of a kaleidoscope. The ceiling canopy has a white varnished finish, while the frame of the suspensions is chrome plated. The glass is available in a choice of three colours: amber, crystal or grey. Fairy 12 R measures 1.2m in length and each suspension hands in different heights, creating a playful effect. The linear suspension is perfect to be installed above a dining area, reception or breakfast counter. Guaranteed to create a sparkling and romantic atmosphere.

?he Fairy Collection includes a wall light and a ceiling light all with the signature glass diffuser with a multitude of facets, in grey, amber or crystal. The family also includes more suspensions with one or more lights suspended from round or rectangular ceiling canopies, please contact us for more information and pricing.

Note: Driver included.
