## PRODUCT DESCRIPTION

**Designer:** Eugeni Quitllet

### Foscarini Satellight Wall Light

A best-seller from the Foscarini brand, the Satellight Wall Light is a beautiful and unique light designed by Eugeni Quitllet in 2017. The wall light emits light both upwards and downwards as the coned structure has an opening in the bottom and the glass globe sits at the top of the light. The included light source sits in the sphere and nicely diffuses outwards, creating a warm glow that is inviting and atmospheric.

The sphere in the Satellight Wall Lamp seems to be suspended in the air, acting as a decorative and evocative light that will catch the eye in any room. Wonderful for both homes and commercial spaces, it can be used by itself or in rows to line the walls in corridors, lounges, dining spaces, hallways and many more. The wall lamp is dimmable so you can create the exact ambience you need and you can also match with others from the stunning Foscarini Satellight collection.
