PRODUCT DESCRIPTION

Menu Task Pendant

The new Task Pendant by Danish designer Gry Holmskov strikes a harmonious, breathtaking balance between function and aesthetics. Pure, linear form not only catches the eye but also serves a key purpose: to spread light in a way ideal for countless applications, giving rise to new, flexible ways of illuminating diverse spaces. The pendant's light intensity and temperature can be adjusted with an app, making it easier than ever to create the best illumination for the time of day, season, or desired ambience.

By installing and using the mobile app, you can control light intensity and color temperature. You can add multiple fixtures into the same system so that you can control one or many lamps with the swipe of a thumb. If the lamp is installed without using the application, it defaults to a medium temperature and intensity for everyday work and life.
