Marset Copernica P LED Floor Lamp

Marset Copernica P LED Floor Lamp is an adjustable floor lamp by Ramírez i Carrillo, built around a counterweight that balances its long steel arm. The mechanism allows the lamp to be moved with a gentle touch, making it easy to change the height and position of the light. Its appearance comes from the way these parts work together, with a circular base, slender metal bars, and a small tiltable aluminium diffuser forming a geometric design that looks almost weightless.

The P floor lamp works well beside a sofa, lounge chair, or desk, where the position of the light may need to change throughout the day. Its adjustable arm allows the light to be brought closer when reading or working, then moved out of the way afterwards. The long, open structure gives Copernica a distinctive appearance, with its counterweight and moving parts left visible rather than concealed within the lamp.

Copernica P is shown in a Graphite-Red-Black finish, with a red counterweight providing a contrasting detail against the dark metal structure. The lamp is plug-in and includes an integrated LED with a three-position dimmer built into the tiltable diffuser. The wider Marset Copernica collection includes table and floor lamps using the same counterweight mechanism. Most suited to living rooms, reading corners, bedrooms, home offices, studios, hotels, and interiors where adjustable lighting is needed.

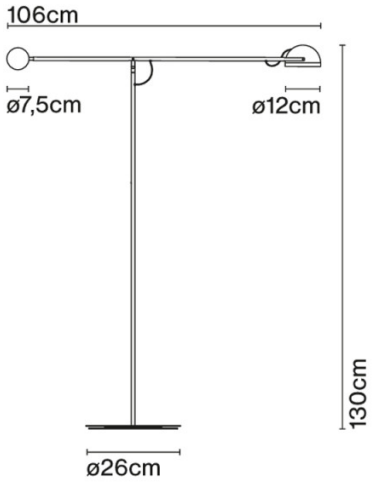

PRODUCT SPECIFICATION

Light Source: 5.94W, 2700K, 416 Lumens

IP Code: 20

Dimming: Integrated dimmer on the product.

Dimensions: Height: 130cm
Length: 106cm
Shade: Ø12cm
Base: Ø26cm
Counterweight: Ø7.5cm
Cable Length: 200cm
