## Marset Copernica M Table Lamp

Copernica was designed by Ramírez i Carrillo in 2017 for Marset Barcelona. Appearing weightless, floating without friction or resistance. Copernica is an impressive display of physics and mathematics to create a counterweight system which can be gently manoeuvred by the light touch of the fingers.

With the use of simplistic shapes circles, semicircles, tubes, and bars of different diameters, Marset have created a stylish geometric sculpture of light.

Available in six colour combinations, featuring graphite, white and black, with gold, nickel ore red to accent.

Marset Copernica collection comprises of a table lamp and two floor lamp options, making it easier than ever to find a lamp to suit your needs perfectly.

Copernica table lamp is ideal for tasks because of the completely directional arm and light source. The design lends itself to both domestic and commercial spaces.
