PRODUCT DESCRIPTION

Designer: Jean Prouvé

Vitra Potence Wall Light

The Potence wall lamp is one of Jean Prouvé's puristic masterpieces. It was designed as a pivoting lamp for Jean Prouvé's house concept 'Maison Tropicque' in 1950. Although the house was not successful, many of the individual elements of the design, such as this lamp have become regarded as modern day masterpieces.

Reduced to the essentials – a light bulb and a pivoting wall mount – the long swing arm is made of powder-coated tubular steel with a beechwood handle. The pure and functional nature of this light makes it fresh and modern, despite being created in the 20th century, and has enjoyed success for many decades. With such a long movement the Potence can serve as both a reading light or a general light when swung into the centre of a room.

This light needs to be installed near a socket as it comes with a cable and plug.

PRODUCT SPECIFICATION

Light Source: 1 x 12W E27 LED (Included)

IP Code: 20

Dimming: In line dimmer included on cable.

Dimensions: Length: 203cm
Height: 109cm
Cable Length: 375cm
