PRODUCT DESCRIPTION

Designer: Giovanni Giacobone & Massimo Roj

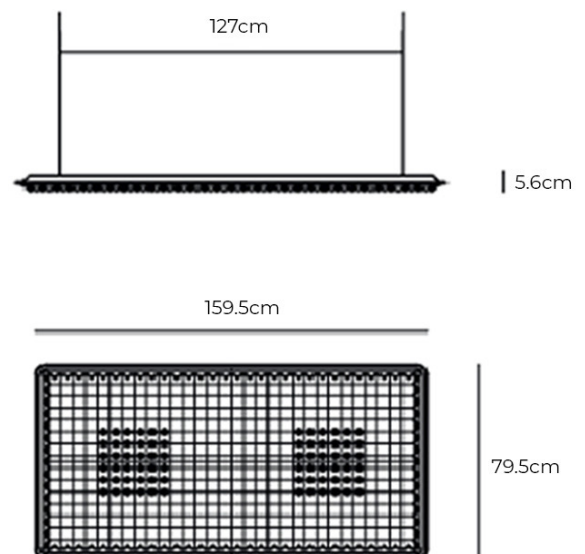

Artemide Eggboard Matrix Direct 1600x800 LED Suspension

The Artemide Eggboard Matrix LED Suspension is an exemplary design made for office spaces and large open rooms, or areas where you need sound-absorbing appliances. A perfect balance of technology, design, and environmental well-being, the Artemide Eggboard enhances both light quality and sound comfort. This suspension light was designed by Giacobone Roj, who is a member of the CMR Project. The luminaire has a sinusoidal cross-section on its lower surface as well as a sound-absorbing material. Eggboard also utilises a plethora of small, low-voltage LED lights along with rotosymmetrical reflectors; these integrated LEDs provide a focused downlight, offering functional illumination and making it a perfect task lighting solution.

Artemide suggests that the Eggboard LED Suspension be installed approximately one meter above your conference table or hosting area to ensure acoustic efficiency. The Eggboard Matrix Direct 1600x800 is the largest in the range, but the design is also available in other sizes, colours, dimming options and colour temperatures. Please [Contact Us](#) for further information.
