PRODUCT DESCRIPTION

Designer: Neil Poulton

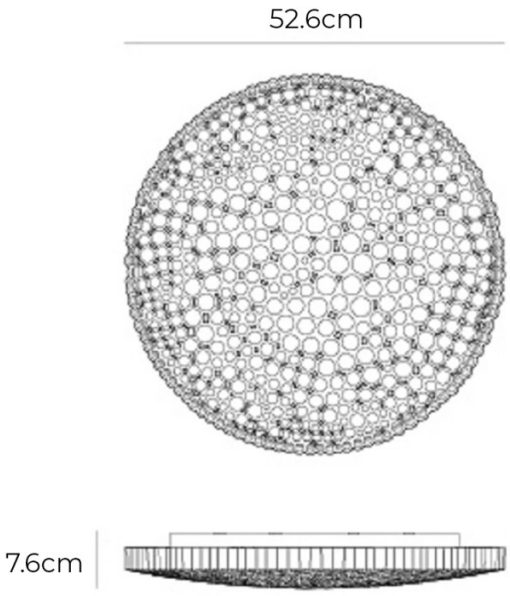

Artemide Calipso App Compatible LED Ceiling / Wall Light

The Artemide Calipso Ceiling/Wall Light was designed by Neil Poulton, who used a moon photograph and a complex algorithm, generating the characteristic honeycomb surface that the luminaire is best known for. Thin in design, with a large surface, the Calipso emits a soft and evenly distributed lighting output. Calipso represents the irregularities in nature's geometry and is comprised of various thin tube sections forming a perfect circle. An amalgamation of optical and decorative intelligence.

The Calipso is also app-compatible, allowing you to control the illumination via an app developed by Artemide. This allows you to control the light intensity via your phone or tablet, and allows you to create your own scenes and scenarios. The Calipso App Compatible is available in a choice of two colour temperatures, 2700K or 3000K. This lighting solution easily adapts to a range of interiors and is a beautiful addition to residential and commercial environments.

PRODUCT SPECIFICATION

Light Source:	55W, 2700K or 3000K, 2884 lumens
IP Code:	20
Dimming:	Dimmable via Artemide app. Dimmable via Push to make/ switch dimming, dimmable using push to make switches. Please consult your electrician, additional wiring may be required on site.
Dimensions:	Ø52.6cm Depth: 7.6cm
