PRODUCT DESCRIPTION

Designer: S.R. Cornelissen

Artemide Architectural Tagora LED Ceiling Light

The Artemide Architectural Tagora Ceiling Light is a sleek design, available in a range of sizes and finishes. Crafted from an aluminium body with a classic black, grey or beige outer finish, this ceiling light allows you to choose your desired internal finish, all of which create a different lighting effect. The Orange interior results in a warmer diffusion, whereas the blue interior results in a colder output, and no matter which finish you decide upon, the result is a functional downlight that is projected onto the environment below.

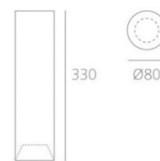

Designed by S.R Cornelissen, the Tagora LED Ceiling Light combines simple shapes and is suitable for both residential and commercial interiors, offering four sizes (80, 270, 570 or 970). The LED light source comes with a colour temperature of 3000K as standard but can be supplied with a 4000K illumination. It is also available as a dimmable or non-dimmable version.
