Davide Groppi Folder Wall Light

The Davide Groppi Folder Wall Light was designed by 967arch in 2013. Its unique folder-shaped design was the motivation for the title. The minimalistic, understated design is a testament to the remarkable craftsmanship of the experts at the design studio. Folder is a masterpiece of form and function, blending style and practicality to offer a truly adaptable lighting solution for any environment.

Folder Wall Light's structure is built from a sheet of metal which has been folded and sprayed with a matte white finish. The structure can be staged in all directions without any direct glare for gentle illumination. Folder Wall Light uses a modern lighting solution that utilises LED technology and produces clear and even light.
