PRODUCT DESCRIPTION

Designer: Davide Groppi

Davide Groppi Flash LED Ceiling / Wall Light

Davide Groppi Flash LED Ceiling / Wall Light is a modern lighting solution that utilises LED technology and produces a direct downlight. The structure features thin 0.9cm wide steel strips that stretch across up to 18 meters in length. This LED strip is fastened to two surfaces, utilising a metal wall and ceiling mount which can be connected wall to wall or wall to ceiling.

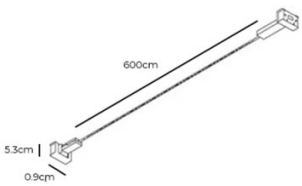

Flash was designed by Davide Groppi himself to provide a bright line which corresponds to its given name: an object moving at the speed of light, leaving behind a streak of bright light. Flash's LED strip produces a crisp and sharp line of LED illumination and is a great addition to contemporary interiors with high ceilings, in both residential and commercial spaces.

The Flash 6 and Flash 12 can be integrated with the Davide Groppi Endless system. The Flash can also be supplied with a cable and plug instead of the need for hardwiring. Please contact us for more information and pricing.

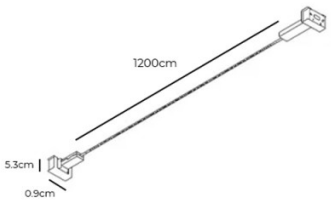

PRODUCT SPECIFICATION

Light Source:	**Flash 6**: 57W, 3000K, 6708 Lumens **Flash 12**: 114W, 3000K, 13416 Lumens **Flash 18**: 171W, 3000K, 20124 Lumens
