PRODUCT DESCRIPTION

Davide Groppi Flash LED Ceiling/Wall Light

The Davide Groppi Flash is a modern lighting solution that utilises LED technology and produces a direct downlight. The structure features thin 9mm wide steel strips that are stretched to give the light up to 18 meters in length, this LED strip is fastened to surfaces utilising a metal wall/ceiling mount and can be connected wall to wall or wall to ceiling.

This bright line resembles its given name; an object moving at the speed of light, leaving behind a streak of bright light. The LED strip produces a bold and sharp line of LED illumination. Flash is a great addition to contemporary interiors with high ceilings, in both residential and commercial spaces.

The Flash 6 and Flash 12 can be integrated with the Davide Groppi Endless system. The Flash can also be supplied with a cable and plug instead of the need for hardwiring, please [contact us](#) for more information and pricing.
