Astro Jura Twin Wall Light

The Astro Jura Twin Wall Light is a solid brass wall light designed to cast illumination both upwards and downwards, creating a clean architectural effect on the wall. Its compact form and warm brass finish give it a more characterful feel than a standard painted outdoor fitting, making it well-suited to entrances, patios, garden walls, and bathroom settings where a simple but more decorative material is preferred.

Made from solid brass, Jura Twin will naturally develop a patina over time, adding to its aged appearance. If preferred, the finish can be restored by polishing. This changing surface quality makes it especially appealing for projects that want a more lived-in, traditional material presence rather than a static factory finish.

Jura Twin uses two GU10 lamps, sold separately, and is dimmable when paired with compatible dimmable bulbs. Rated IP44, it is suitable for outdoor use and for bathroom zones 2 and 3. Please note that this fitting is not suitable for installation within five miles of the coast.

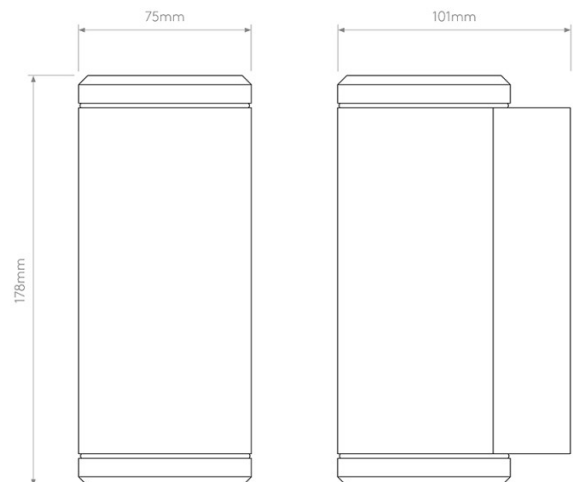

PRODUCT SPECIFICATION

Light Source: 2 x Max 6W GU10 LED (Excluded)

IP Code: 44

Dimming: Dimmable via mains phase dimming.

Dimensions: Height: 17.8cm
Width: 7.6cm
Depth: 10.1cm
