Astro Serifos 220 Wall Light

Astro Serifos 220 Wall Light is a classic half-cylinder interior wall light with a white plaster finish, vertical wall-mount installation, and wired-in Class I construction.

The Serifos 220 casts a wash of warm light upwards and downwards, making it useful for corridors, living areas, and other interiors that need soft wall illumination. Its plaster finish can be painted to match an interior scheme, allowing the fitting to sit closely with the surrounding wall surface.

The Serifos 220 is unswitched and dimmable depending on the lamps selected, with no separate driver required. For preparation and finishing guidance, follow Astro's painting guide before decorating the fitting. Most suited to corridors, hallways, living areas, bedrooms, and painted interior wall schemes.
