PRODUCT DESCRIPTION

Designer: Tom Dixon

Tom Dixon Melt LED Surface Light

The Tom Dixon Melt Surface Light can be installed on either a wall or ceiling, depending on the space. For this version of the Melt, the familiar spherical form has been compressed while retaining the distinctive shape of the collection. The injection-moulded diffuser changes from a mirrored surface when switched off to a molten glass effect when illuminated.

The Melt Surface Light is also available in an Opal finish with a choice of Silver or Gold wall mount. Unlike the metallic versions, the Opal shade remains opaque when switched off and becomes a soft glowing orb when illuminated, providing a higher light output. The **Tom Dixon Melt Collection** also includes a smaller surface light, pendants in two sizes, multiple canopy options, floor lamps, table lamps and portable designs.

Tom Dixon introduced the Bronze finish to mark Melt's tenth anniversary, adding a softer, more muted metallic option to the range. For 2026, the Surface Light is also available in a new Nickel finish, bringing a cooler tone to the collection while retaining the same reflective surface and molten effect when illuminated.

Please Note: The integrated LED light engine of the Melt Surface Light is replaceable. This can only be sourced via Tom Dixon. Please contact us for more details and pricing.

PRODUCT SPECIFICATION

Light Source:	6W, 3000K, 800 Lumens
IP Code:	20
Dimming:	Dimmable using leading edge and trailing edge.
Dimensions:	Width: 50cm Height: 50cm Depth: 28cm
