PRODUCT DESCRIPTION

Designer: Daniel Libeskind

Slamp Cordoba LED Suspension

The Cordoba suspension light is an architectural expression of contrasting geometric forms arranged into a sculpture that exudes originality. Designed by Daniel Libeskind, this suspension is inspired by the Spanish Cordoba and its architecture. It impresses because of its size alone, and above all because of its remarkable shape. The jagged geometry is typical for Libeskind's work and turns Cordoba into a strong design statement which thrills architecture lovers.

This unique luminaire is crafted using Cristalflex®, a more resistant type of plastic that was patented by Slamp themselves and can be shaped in complex ways: the stunning silhouette, with its asymmetrical outline, appears to be made up of disconnected fragments. Cordoba is hand crafted and offers varying points of view even when it is seen as a whole - close attention has been paid to maximize its illumination. Each element of this piece was created following an algorithm designed to harmoniously diffuse light into your space.

Because of its size and remarkable charm, Cordoba is ideal for larger rooms and halls with high ceilings. It is perfect for public interiors, but Cordoba also appeals in private homes, because of its warm white light, neutral colour and the high performance integrated LEDs which can be dimmed and provide a comfortable lighting atmosphere in your home.

Cordoba Slamp Pendant Lamp is a magical suspension lamp that will give any room sense of majesty with different end points.

PRODUCT SPECIFICATION

Light Source:	130W, 2900K, 15,000 Lumens
IP Code:	20
Dimming:	Dimmable via Triac dimming systems.
Dimensions:	Length: 104cm Width: 76cm Height: 55cm Drop: 20-600cm
