PRODUCT DESCRIPTION

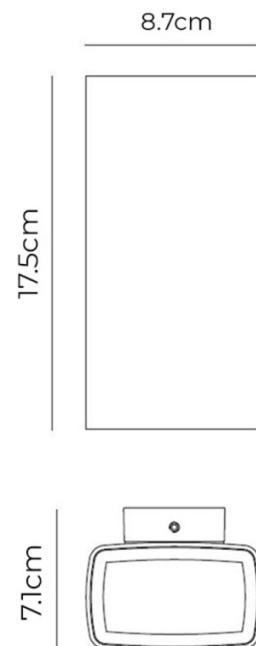

Designer: Piero Lissoni

Flos Climber 87 Up & Down LED Wall Light

Designed and perfected for outdoor use, the Climber 87 Up & Down LED Wall Light emits light both upwards and downwards at a beam angle of 14° or 73°. The lower part of the light has a shutter that restricts any glare, providing a soft illumination, while in the upper part, glass seals the light and does not allow for any water to sit. The smallest light in the [Flos Climber collection](#) by designer Piero Lissoni, the 87 Up & Down Wall Light can be used in both indoor and outdoor areas thanks to its discreet, stylish and minimalist design.

Available in six colours, grey, white, forest green, black, deep brown and anthracite, the Climber range also includes two alternative sizes, all of which are available in just a downwards emission or a down and upwards light emission. The Climber 87 Up & Down Wall Lamp is also available in 2700K (warmest white), 3000K (warm white) and 4000K (cool white) colour temperatures.
